### A MobilityScan™ Solution

Mobile Solutions by ScanOnline

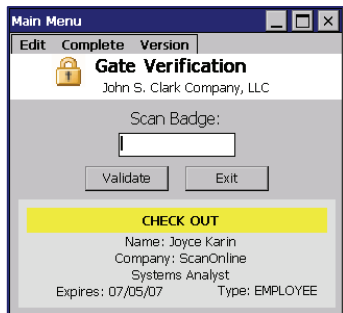

The following screen is displayed when the *On the Job* first starts. The user can scan or manually enter the badge id number. Press enter on the keypad or click the Validate button to validate the badge and check the user in or out of the system.

If a valid badge is scanned and the badge is not currently checked into the system, the badge will be checked in. The screen below will be displayed when a badge is checked in.

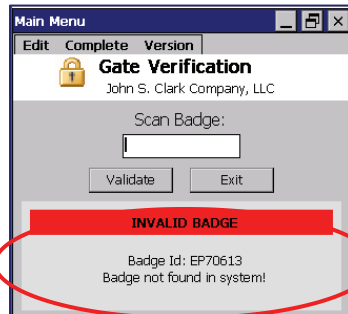

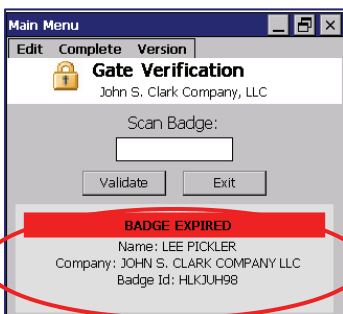

If a valid badge is scanned and the badge is currently checked into the system, the badge will be checked out. The screen below will be displayed when a badge is checked out.

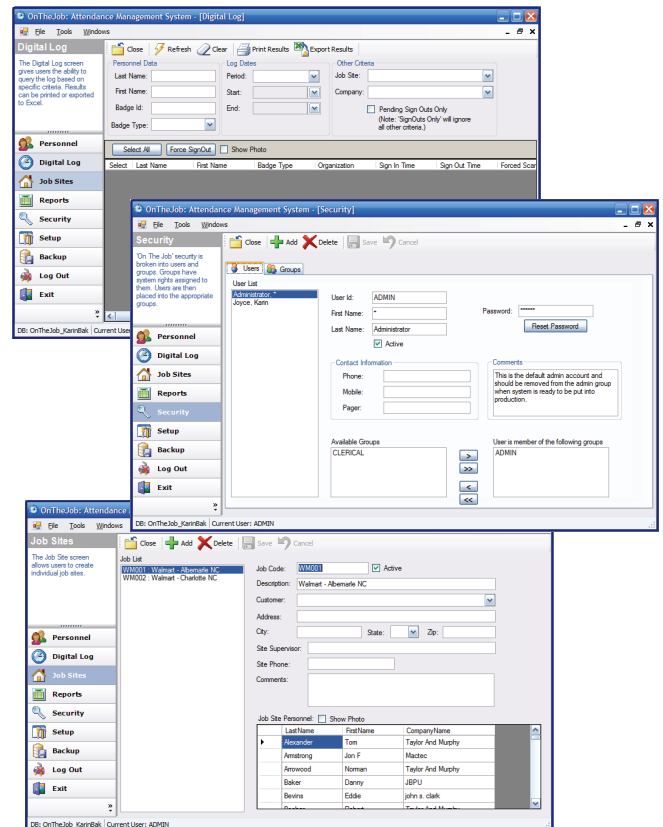

If a badge was scanned that is expired, the following screen will be displayed.

If a badge was scanned that was not found in the system, an “invalid badge” message will be displayed. See screen below.
